PII: S0045-7930(98)00026-7

LIST OF CONTENTS

NUMBER 1

Zhong-Min Wang and **Soon-Keat Tan**	1	Vibration and pressure fluctuation in a flexible hydraulic power system on an aircraft
M. R. Overholt and **S. B. Pope**	11	A deterministic forcing scheme for direct numerical simulations of turbulence
S. F. Tsai and **Tony W. H. Sheu**	29	Some physical insights into a two-row finned-tube heat transfer
Manoj T. Nair, **Tapan K. Sengupta** and **Umendra S. Chauhan**	47	Flow past rotating cylinders at high Reynolds numbers using higher order upwind scheme
S. Kaushik and **S. G. Rubin**	71	Pressure based flux-split solutions for incompressible and compressible internal flows
M. A. Habib, **Ikram Ul-Haq**, **H. M. Badr** and **S. A. M. Said**	95	Calculation of turbulent flow and heat transfer in periodically converging–diverging channels
R. A. Sahan, **H. Gunes** and **A. Liakopoulos**	121	A modeling approach to transitional channel flow

NUMBER 2

K. Hanjalić and **S. Jakirlić**	137	Contribution towards the second-moment closure modelling of separating turbulent flows
Yong-Sun Wie and **Mujeeb R. Malik**	157	Effect of surface waviness on boundary-layer transition in two-dimensional flow
Serge Piperno and **Sophie Depeyre**	183	Criteria for the design of limiters yielding efficient high resolution TVD schemes
J. H. Miller, **J. C. Tannehill**, **S. L. Lawrence** and **T. A. Edwards**	199	Parabolized Navier–Stokes code for hypersonic flows in thermo-chemical equilibrium or nonequilibrium
Michael J. Nusca	217	Numerical simulation of electromagnetic wave attenuation in nonequilibrium chemically reacting flows
Philippe Reynier and **Hieu Ha Minh**	239	Numerical prediction of unsteady compressible turbulent coaxial jets
Lee-May Huang, **Chin-Chin Tsai** and **Ta-Jo Liu**	255	Theoretical analysis of non-Newtonian jets emanating from a converging channel

François Bade and Pierre Haldenwang 273 High order scheme for thermally driven flows in an open channel

NUMBER 3

F. Ilinca, J.-F. Hétu and D. Pelletier 291 A unified finite element algorithm for two-equation models of turbulence

Kyu Hong Kim, Joon Ho Lee and Oh Hyun Rho 311 An improvement of AUSM schemes by introducing the pressure-based weight functions

Ming-Hsi Hsu, Wei-Hsien Teng and Chintu Lai 347 Numerical simulation of supercritical shock wave in channel contraction

Giuseppe Pontrelli 367 Pulsatile blood flow in a pipe

S. Séror, E. Schall and D. E. Zeitoun 381 Comparison between coupled Euler/defect boundary-layer and Navier–Stokes computations for nonequilibrium hypersonic flows

Jinsoo Cho and Seung-Chul Lee 407 Propeller blade shape optimization for efficiency improvement

NUMBER 4

O. Botella and R. Peyret 421 Benchmark spectral results on the lid-driven cavity flow

T. S. Lee 435 Early stages of an impulsively started unsteady flow past non-rectangular prisms

J. E. Romate 455 An approximate Riemann solver for a two-phase flow model with numerically given slip relation

P. A. Sleigh, P. H. Gaskell, M. Berzins and N. G. Wright 479 An unstructured finite-volume algorithm for predicting flow in rivers and estuaries

S. Park and Kunwoo Lee 509 Automatic multiblock decomposition using hypercube++ for grid generation

Z. J. Wang 529 A Quadtree-based adaptive Cartesian/Quad grid flow solver for Navier-Stokes equations

NUMBERS 5 & 6

Special Issue

Selected Papers from the 6th International Symposium on Computational Fluid Dynamics

Guest Editors:
M. Hafez
K. Oshima

M. Hafez and K. Oshima 551 Preface

Z. Jiang and **K. Takayama**	553	Reflection and focusing of toroidal shock waves from coaxial annular shock tubes
Y. Mochimaru	563	Extension of spectral finite difference schemes for computational fluid dynamics
Satoru Yamamoto, Shintaro Kano and **Hisaaki Daiguji**	571	An efficient CFD approach for simulating unsteady hypersonic shock–shock interference flows
Masayuki Hatakeyama, Masao Watanabe and **Toshihito Suzuki**	581	Object-oriented fluid flow simulation system
Kenichi Matsuno, Masashi Yamakawa and **Nobuyuki Satofuka**	599	Overset adaptive-grid method with applications to compressible flows
H. Babinsky, O. Onodera, K. Takayama, T. Saito, P. Voinovich and **E. Timofeev**	611	The influence of entrance geometry of circular reflectors on shock wave focusing
Teruo Miyazaki	619	On arbitrary inlet and wall boundary conditions in cascade flows for the Navier–Stokes solver
Jian-Ping Wang	639	Finite spectral method based on non-periodic Fourier transform
Yoko Takakura, Fumio Higashino and **Satoru Ogawa**	645	Unsteady flow computations on a flying projectile within a ballistic range
Tuncer Cebeci, Eric Besnard and **Hsun H. Chen**	651	An interactive boundary-layer method for multielement airfoils
Mark Sussman, Emad Fatemi, Peter Smereka and **Stanley Osher**	663	An improved level set method for incompressible two-phase flows
Wolfgang Sanz and **Max F. Platzer**	681	Numerical investigation of the stall onset behaviour of the GA(W)-1 airfoil
C. Berezin and **L. Sankar**	689	Improvements to a tightly coupled viscous–inviscid procedure for three-dimensional unsteady transonic flow
Harry A. Dwyer and **J. Grcar**	695	Solution of the Navier–Stokes equation with finite-differences on unstructured triangular meshes
C. Kiris, D. Kwak and **R. Benkowski**	709	Incompressible Navier-Stokes calculations for the development of a ventricular assist device
Jean-Jacques Chattot and **Yong Wang**	721	Improved treatment of intersecting bodies with the chimera method and validation with a simple and fast flow solver

NUMBER 7

R. F. Kunz, B. W. Siebert, W. K. Cope, N. F. Foster, S. P. Antal and **S. M. Ettorre**	741	A coupled phasic exchange algorithm for three-dimensional multi-field analysis of heated flows with mass transfer
A. A. Lorber, G. F. Carey, S. W. Bova and **C. Harlé**	769	Accelerated solution of non-linear flow problems using Chebyshev iteration polynomial-based Runge–Kutta recursions
A. Vardy and **Z. Pan**	783	Interpolation in transient polytropic flow
G. C. Hocking and **J-M. Vanden-Broeck**	797	Withdrawal of a fluid of finite depth through a line sink with a cusp in the free surface
N. Takada and **M. Tsutahara**	807	Evolution of viscous flow around a suddenly rotating circular cylinder in the lattice Boltzmann method
Y. Yang and **G. Tryggvason**	829	Dissipation of energy by finite-amplitude surface waves
G. Mompean	847	Numerical simulation of a turbulent flow near a right-angled corner using the Speziale non-linear model with RNG K–ε equations

NUMBER 8

A. E. Croucher and **M. J. O'Sullivan**	861	Numerical Methods for Contaminant Transport in Rivers and Estuaries
Steve Yon and **C. Pozrikidis**	879	A Finite-volume/Boundary-element Method for Flow Past Interfaces in the Presence of Surfactants, with Application to Shear Flow Past a Viscous Drop
R. Bhaskaran and **A. P. Rothmayer**	903	Separation and Instabilities in the Viscious Flow over Airfoil Leading edges
R. Savino, R. Monti and **M. Piccirillo**	923	Thermovibrational Convection in a Fluid Cell
J. Richard Amaladas and **H. Kamath**	941	Accuracy Assessment of Upwind Algorithms for Steady-state Computations
Robert L. Roach and **Shi Yanping**	963	Unconditional Stability, Monotonicity and Accuracy of the Linear Exponential Interpolation Function For the Burgers Equation
A. Povitsky	985	Efficient parallelization of a parabolized flow solver
	I	Announcements
